

InstaCom™ by Convergent Mobile Named Exclusive Alerts Vendor of P.A.C.E.

Convergent Mobile a leading provider of mobile communication solutions for schools, municipalities, and business (www.convergentmobile.com), has been selected as the exclusive vendor for P.A.C.E. (Private Nursery School Association of California, Inc. dba Professional Association for Childhood Education) and it's over 1,000 member schools. As a result of this appointment, InstaCom™ will provide effective and instant communications between the P.A.C.E. Schools' administrators and its staff and parents via text, email and voice messages.

"Convergent's InstaCom platform will be a tremendous resource for the Member schools that will increase connectivity to parents and faculty in emergency situations and otherwise. We are excited about the capability and reliability that this provides to our schools and families," explains Gina Ayllon, PACE Executive Director.

"Consistent and instant communication between a school and their parent community may make the ultimate difference in an emergency. Time and again we have seen the same comments from emergency personnel after the fact – that the rush of parents to the school impeded their response and effectiveness. InstaCom leverages modern communication technology so schools can instantly communicate with parents and help keep their kids safer," said Mark Porter, CEO of Convergent.

"Being selected by P.A.C.E. is an exciting opportunity and we look forward to partnering in their continued growth and success," continued Porter.

Whether communicating emergency instruction or simply providing timely, general information such as special school event announcements, or parent-teacher conference notifications, InstaCom provides a seamless, multi-channel delivery system.

About Convergent Mobile: Convergent Mobile is a mobile technology and solutions provider offering hosted mobile marketing and communications platforms for business. Businesses can communicate with employees, customers or prospects via SMS (text), email, voice and even paging. In addition, Convergent has developed its own vertical applications for Real Estate, Schools, Classified Ads and Healthcare.

About PACE: The Professional Association for Childhood Education (PACE) is a nonprofit, tax-exempt, and membership-based organization. PACE was established in 1955 to fill the legislation, education and development needs of early child care professionals. Our mission is to promote excellence in education and quality child care in private center-based programs.

We are statewide. We operate in over 1,000 centers serving more than 55,000 of California's children. www.pacenet.org.
