Convergent Connects Real Estate Buyers and Agents via SMS.

Sonoma, CA (PRWeb) October 28, 2008 – Convergent Mobile, Inc., a mobile marketing service provider, has created a hosted communications platform that allows real estate buyers to conveniently receive a property's information instantly to their cell phone by texting a unique keyword to a designated short code (text messaging world's phone number). Instead of getting out of the car to look for a traditional property flyer, buyers can utilize the code and message displayed on the sign rider, to instantaneously retrieve agent contact information and pertinent information about the property free of charge.

The services offered by Convergent Mobile represent a significant advantage to real estate agents, in that modern buyers expect lightning quick responses to their inquiries and up-to-date, real time information. With a simple and user-friendly web interface, and information that is updated live from the MLS, the technology offered by Convergent Mobile ensures a minimum amount of extra work for real estate agents.

Utilizing Convergent Mobile to market properties eliminates the hassle and significant costs involved with printing, designing, and distributing flyers. In addition, agents who use Convergent Mobile differentiate themselves from the competition, by earning reputations as tech-savvy, eco-minded professionals who are committed to providing convenient services for their buyers.
